

THE AMENDED CLAIMS

1. (Currently amended) A swimsuit comprising:
 - (a) a loop configured to at least partially encircle a human waist;
 - (b) a fastening device configured to couple a first part of a body of the swimsuit to a second part of the swimsuit body, the first and second parts not being on the loop; and
 - (c) a storage compartment on the swimsuit body configured to stow the body; wherein the loop is positioned relative to the swimsuit body so that when said fastening device is engaged, the swimsuit may be worn by a human around the waist in a discrete manner.
2. (Previously presented) The swimsuit of claim 1 wherein said loop is adapted to completely encircle said human waist.
3. (Original) The swimsuit of claim 1 wherein said loop is selected from the group consisting of (i) a decorative chain, and, (ii) a tubular member.
4. (Previously presented) The swimsuit of claim 1 wherein the loop comprises a chain made of a material resistant to corrosion.

5. (Currently amended) A method of removing a swimsuit separable at at least one point by a fastening device while leaving it attached to a human ~~body~~waist, comprising:
- (a) decoupling at least one fastening device on a body of the swimsuit and separating a first part of the body of the swimsuit from a second part of the body of the swimsuit, the first and second parts not being on a loop;
 - (b) compacting the body of the swimsuit into a small space while keeping the loop around the waist;
 - (c) storing the compacted body of the swimsuit using at least one storage compartment on the body of the swimsuit; and
 - (d) using a loop at least partially encircling the human body for supporting the swimsuit on the human ~~body~~waist.
6. (Original) The method of claim 5 wherein the storing of the compacted body of the swimsuit using the at least one storage compartment is performed through an opening at an end of the at least one storage compartment.
7. (Original) The method of claim 5 wherein the at least one storage compartment comprises two storage compartments.
8. canceled
9. canceled

10. canceled.
11. (Currently amended) A swimsuit comprising:
- (a) a loop configured to at least partially encircle a human waist;
 - (b) a body having a front end and a rear end, the front end having a width greater than the rear end;
 - (c) a single fastener configured to detachably couple the rear end of the body to said loop, there being no other fastener coupling the rear end of the body to said loop; and
 - (d) a storage compartment on the front of the swimsuit configured to stow the body;
- wherein the loop is positioned relative to the swimsuit body so that when said fastener is attached, the swimsuit may be worn by a human.
12. (Original) The swimsuit of claim 11 wherein said loop is adapted to completely encircle said human waist.
13. (Original) The swimsuit of claim 11 wherein said loop is selected from the group consisting of (i) a decorative chain, and, (ii) a tubular member.
14. (Previously presented) The swimsuit of claim 11 wherein the loop comprises a chain made of a material resistant to corrosion.
